SMART HOME Smart Plug with energy monitoring, 2.4GHz, white

With the DELTACO SMART HOME app you handle all the switch operation. The installation goes very quickly and smoothly, the only thing you need is a functioning wireless network, ie. no special hubs or gateways. In the app, in addition to turning the power switch on or off, you can also set a timer if you want the power switch to turn off after a certain time. Alternatively, you can schedule specific times when it should be turned on or off. The DELTACO SMART HOME app also offers the possibility to create automatic actions. For example, the power switch turns off when the sun goes down, or if you want to group more power switches together to perform the same thing at a given time. The DELTACO SMART HOME app is of course available for free download for both Android and iOS.
